## **SUSTAINABILITY**

RSNA is committed to hosting one of the most sustainable meetings in the industry. Waste diversion is the prevention and reduction of generated waste through source reduction, recycling, reuse or composting. Waste diversion generates a host of environmental, financial and social benefits, including conserving energy, reducing disposal costs and reducing the burden on landfills and other waste disposal methods. Through our recycling efforts at the 2016 meeting, we had a facility diversion rate of 64.1 percent.

RSNA 2016 environmental statistics:

- 2,738 trees saved

- 12,722 gallons of oil conserved
- 644,160 kWh/Tons electricity saved
- 1,127,280 gallons of water conserved
- 322,080 total pounds recycled
