
RSNA Press Release

November 8th Is International Day of Radiology

Released: November 7, 2019

OAK BROOK, Ill. (Nov. 8, 2019) — Today is International Day of Radiology (IDoR), celebrated around the world in recognition of the remarkable contributions made by medical imaging to health care, and the role of radiology professionals in providing quality care to patients. The day is sponsored by the Radiological Society of North America (RSNA), the European Society of Radiology (ESR), and the American College of Radiology (ACR).

Held each year on November 8th—the anniversary of the discovery of the X-ray by German physicist Wilhelm Roentgen—IDoR is building greater awareness of the value that radiology research, diagnosis and treatment contribute to safe and effective patient care.

IDoR recognizes the many innovations in radiology research that have revolutionized modern medicine, produced great technological advances and saved countless lives.

Radiology professionals are working together throughout the year to inform patients about the valuable role medical imaging plays in patient care. RSNA and ACR jointly sponsor RadiologyInfo.org, an important patient resource that explains medical imaging tests and treatments in detailed, easy-to-understand language, helping patients to understand and prepare for imaging procedures. The site contains explanations of more than 270 disease and conditions and radiology procedures. It also provides information on screening and wellness and safety topics.

For this year's celebration, ESR has launched a brand new [sports imaging microsite](#) to show the general public how radiology is used in the diagnosis and management of sports injuries with reference to the real-life experience of 28 athletes from a selection of the world's most popular sports.

Visit the official [International Day of Radiology website](#) to learn more.

###

RSNA is an association of over 53,400 radiologists, radiation oncologists, medical physicists and related scientists, promoting excellence in patient care and health care delivery through education, research and technologic innovation. The Society is based in Oak Brook, Ill. (RSNA.org)

ACR, founded in 1924, is a professional medical society dedicated to serving patients and society by empowering radiology professionals to advance the practice, science, and professions of radiological care.

ESR is an apolitical, non-profit organisation, dedicated to promoting and coordinating the scientific, philanthropic, intellectual and professional activities of radiology in all European countries.
