## RSNA Press Release

### RSNA Announces Spotlight Course in Emergency Radiology

Released: January 8, 2016

OAK BROOK, Ill.—The Radiological Society of North America (RSNA) will offer its first regional course later this year in Mexico. RSNA Spotlight: Radiología de Urgencias: Curso Interactivo con Casos Mexico 2016 will be held June 2 to 4, 2016, at the Grand Fiesta Americana Coral Beach Cancún Resort & Spa in Cancún, Mexico.

The course launches a new RSNA initiative, providing quality education on important medical imaging issues in different regions. Cancun was selected as the site for the course debut, based on an assessment of the educational needs of RSNA members in Latin America.

During the 2 ½-day program presented entirely in Spanish, participants will explore the use of emergency radiology as part of daily practice. The course will include general and breakout sessions, Cases of the Day, and interactive RSNA Diagnosis Live™ sessions, and will offer credits for continuing medical education.

"This spotlight course was designed to provide a high-level update on various aspects of one of the fastest growing fields in radiology: emergency imaging," said Jorge Soto, M.D., from Boston University School of Medicine. "The need for 24-hour onsite coverage or off-site interpretations by well-trained radiologists is now commonplace in emergency centers throughout the world. The format of the course, with small group workshops and lectures with audience response, is well suited to allow the attendees to interact closely with the faculty."

Presented under the direction of Dr. Soto and Guillermo Elizondo Riojas, M.D., Ph.D., from University of Nuevo Leon in Monterrey, Mexico, the course will be taught by renowned leaders in the specialty of radiology. Many of the instructors are from Latin America and will discuss issues of special relevance to the region.

"This course addresses an important and broad topic, with both plenary sessions and small group workshops, using interactive tools and activities," Dr. Riojas said. "The professors are among the best Spanish-speaking lecturers, and the location is ideal."

Registration is now open. Attendees who register before February 29 will receive discounted prices for early booking. There are also special rates available to RSNA members. For more detailed program and speaker information, visit [RSNA.org/Spotlight](http://RSNA.org/Spotlight).

###

RSNA is an association of more than 54,000 radiologists, radiation oncologists, medical physicists and related scientists, promoting excellence in patient care and health care delivery through education, research and

technologic innovation. The Society is based in Oak Brook, Ill. ([RSNA.org](https://www.rsna.org))
