Carolyn C. Meltzer, M.D., Joins RSNA Board of Directors

Released: December 3, 2019

CHICAGO (Dec. 3, 2019) — Carolyn C. Meltzer, M.D., an internationally recognized neuroradiologist, nuclear physician and leader in organized radiology, joined the Radiological Society of North America (RSNA) Board of Directors today at the Society's annual meeting in Chicago. She will serve as the board liaison for science.

"I am delighted to serve RSNA at such an exciting time in the journey that is radiology," Dr. Meltzer said. "Our field continues to evolve, lead and catalyze transformative progress in health care, research and discovery, and workforce development. This is one of those periods of enormous headway, when disruptive developments such as AI/data science, theranostics, patient-centered interventions, and team-based care models will guide us toward an exciting future."

Dr. Meltzer is the William P. Timmie Professor and Chair of the Department of Radiology and Imaging Sciences and executive associate dean of faculty academic advancement, leadership and inclusion at Emory University School of Medicine in Atlanta. She also serves on the board of the Emory Clinic and the Emory Medical Care Foundation.
From 2007 to 2019, Dr. Meltzer served as the director of the Innovation Catalyst Program for the Georgia Clinical and Translational Science Alliance and as associate dean for research in the School of Medicine. She established the Emory Center for Systems Imaging to broadly support the advance of imaging capabilities in basic and translational research.

Dr. Meltzer is an advocate for thoughtful professional development and has individually mentored approximately 70 pre- and post-doctoral trainees and junior faculty. Under her leadership as department chair, the Emory Radiology Leadership Academy was created and has now graduated over 100 professionals.

An ardent supporter of identifying opportunities for professionals of all backgrounds, Dr. Meltzer was named the inaugural chair of RSNA's Committee on Diversity and Inclusion in 2018. She serves on the American College of Radiology (ACR) Commission for Women and Diversity and the Steering Committee of the Association of American Medical Colleges Group on Women in Medicine and Science. She also developed and implemented a program to enrich diversity, equity and inclusion at Emory.

A former RSNA Research Scholar grant recipient, Dr. Meltzer serves on the board of trustees for the RSNA Research and Education (R&E) Foundation and is a member of the R&E Foundation's Evaluation Committee. She is a former chair of RSNA's Quantitative Imaging Biomarkers Alliance (QIBA) task force and of the Research Development Committee.

Dr. Meltzer is a past president of both the American Society of Neuroradiology and the Academy for Radiology and Biomedical Imaging Research. Reflective of her commitment to academic medicine, Dr. Meltzer has held numerous national leadership roles and served on professional and advisory boards, including the advisory council for the National Institute for Biomedical Imaging and Bioengineering, the ACR board of chancellors, the Association of University Radiologists Board of Directors, and the International Society of Strategic Studies in Radiology Executive Committee. She served as inaugural chair of the ACR Commission on Research. She serves on the board of directors of the GE-AUR Radiology Research Academic Fellowships, as secretary-treasurer of the Society of Chairs of Academic Radiology Departments, and as chair of the Coalition for Imaging and Bioengineering Research.

Highly awarded for her outstanding leadership in research and education, Dr. Meltzer received the Outstanding Contributions in Research Award in 2016 and a gold medal in 2019 from the American Society of Neuroradiology. In 2018, she was recognized as the RSNA Outstanding Researcher and was awarded a gold medal from the Association of University Radiologists.

Dr. Meltzer earned her medical degree from The Johns Hopkins School of Medicine in Baltimore, Maryland, and completed her fellowship at The Johns Hopkins Hospital. She began her career at the University of Pittsburgh in Pennsylvania and was named medical director of the PET Facility in 1998 and chief of neuroradiology and vice chair of research in the department of radiology in 2002. While there, she was engaged in neuroscience and oncologic imaging research and oversaw the clinical evaluation of the world's first combined human PET/CT scanner.

Dr. Meltzer has published more than 200 papers. She has maintained 22 years of National
Institutes of Health (NIH) funding as principal or co-investigator for research into the detection and study of aging-related brain conditions and diseases and the development and validation of imaging technology.

Note: Copies of RSNA 2019 news releases and electronic images will be available online at [RSNA.org/press19](https://RSNA.org/press19) beginning Monday, Dec 2.

RSNA is an association of over 53,400 radiologists, radiation oncologists, medical physicists and related scientists, promoting excellence in patient care and health care delivery through education, research and technologic innovation. The Society is based in Oak Brook, Ill. ([RSNA.org](https://RSNA.org))
